

Commercial TerraPro®

Soil Amendment & Soil Probiotic formula

"TerraPro is a Soil Ecology product that helps to prime, build, and support a vigorous soil ecological environment that is beneficial to all concerned, including the soil microbes, the Soil Food Web, and the vegetation growing on the site."

Guaranteed Minimum Percentage of Humic Acids = 50% (California Method of Analysis)

Humic acids are not a plant or microbial food

The active ingredient of this product are a group of Humic molecules forming a bio-organic matrix of carbon rich bio-identical molecules. This product was formulated using an "intimate mixture formulation" under a Commercial Proprietary Information contract owned by Soil Secrets. These molecules are the active functional molecules that define the carbon rich fraction of top soil, actively engaged in the molecular biology of soil. They participate in, support and fortify the essential bio-geo-chemical process of soil.

Ingredients: A formulation of Bio-Identical **Supramolecular Humic Molecules** often called Humic Acids, a Commercial Proprietary Information product of Soil Secrets LLC.
Bio-Pack, a Probiotic consortium of synergistic soil microbes.

Application Rate:

Amount needed is determined by the needs of the site. Product can be top-dressed onto the surface and watered in., or lightly cultivated into the top ¼" to ½" inch. Going deeper may be necessary for Petroleum Hydrocarbon remediation, Salinity treatment and Sodium remediation. For best results also apply ½ bag of **Protein Crumbles** per 1000 square foot area at the same time.

Direction for Use: Top dress or cultivate into the soil, followed by irrigation after applying. If flood irrigating, cultivating into the soil is ideal. TerraPro can either be used as a stand alone product on all landscapes, farms, or gardens or combined with our **Protein Crumbles**. Can also be used on all house plants at 1 teaspoon per 1 gallon size pot, top-dressed, or mixed into potting soil at 5% of mix weight.

Not for human, livestock or pet consumption.
